Course: Web Technologies

Lab Task 01: Basic HTML Structure and Text Formatting

Instructions:

1. **Complete the task using HTML5 only.**
2. **Do not use CSS or JavaScript.**
3. **Use proper HTML indentation and comments.**
4. **Save the file with .html extension.**
5. **Push the completed file to your GitHub repository.**

Scenario:

Before building interactive or styled web pages, students must understand the basic structure of HTML documents and common text-level elements.

Part A: HTML Document Structure

1. Declare HTML5 doctype.

2. Use <html>, <head>, and <body> correctly.

3. In <head>, include:

- <title>
- <meta charset="UTF-8">
- <meta name="description">

Part B: Headings and Paragraphs

- Use all heading tags <h1> to <h6> at least once.
- Write two paragraphs using <p>.

Part C: Text Formatting Tags

Use the following tags at least once:

- <strong>

- <em>

- <mark>

- <small>

-

- <hr>

Part D: Comments

Add HTML comments explaining different sections of the page.
